ABOUT US

MSR Construction Company Ltd., established in Saudi Arabia in 2023 as a foreign investor, is a Türkiye-based construction company that has been delivering high-quality engineering and architectural services for many years. Since 2014, our company has successfully completed and delivered architectural metal and glass works for major projects across Saudi Arabia, as well as Information & Communication Technologies (ICT) works within the Haramain High-Speed Railway Project.

With deep expertise in custom architectural elements such as aluminum gates, canopies, cabanas, louvers, fences, ladders, and weathered steel structures, MSR Construction continues to provide end-to-end solutions that combine aesthetics, durability, and functionality.

Within the framework of Saudi Arabia's Vision 2030, our goal is to be a trusted solution partner to major contractors and to contribute to the Kingdom's rapid construction growth through our commitment to quality, precision, and innovation.

At MSR Construction, we take pride in being part of the projects that shape the future — from recreation areas and diving centers to tennis courts, helipads, and shading systems — ensuring excellence in every detail.
